

ONYX HD4170

Coil Insertion & Crimping

The HD4170 Electric “Rhin-O-Roll” Coil Inserter Module has 12 inch dual powered rollers with an adjustable lower roller for high performance easier more accurate coil insertion.

It has gauges to measure document thickness and coil sizing. The HD4170 can be used as a stand-alone production coil inserter or it can be attached to any vertical OD or HD Series machine (optional mounting kit available). Designed for fast coil insertion for all pitches and diameters. The HD4170 comes with crimper pliers and a built-in holder.
